In the paper “ γ -Ray induced color centers in pure and Yb doped LiYF_4 and LiLuF_4 single crystals”, published in Optical Materials 28 (2006) 123–128 by S.M. Kaczmarek, A. Bensalah, G. Boulon, we have found a mistake in Fig. 2. Unfortunately, Fig. 2a was placed twice, instead of Fig. 2b. The correct Fig. 2 is shown below.

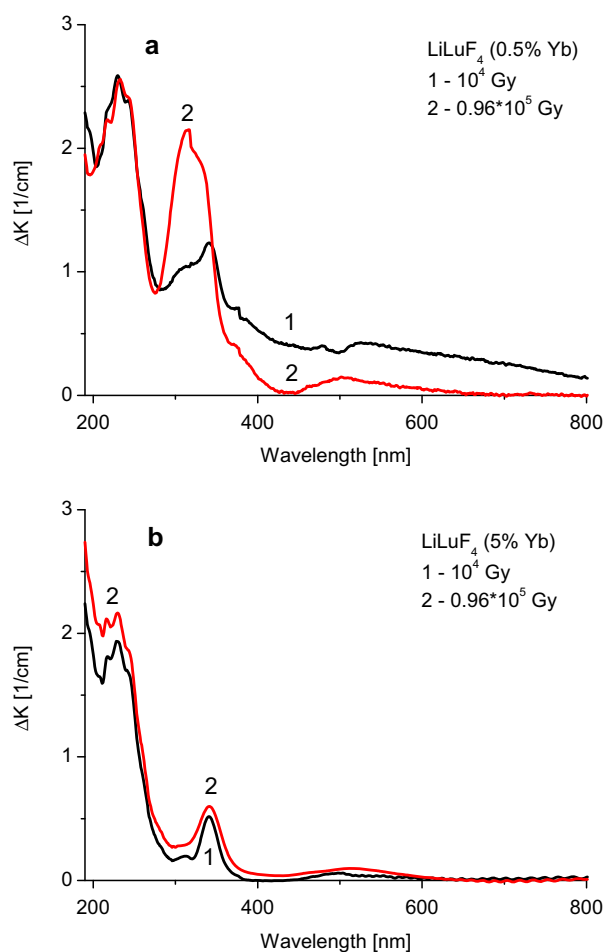

Fig. 2. Induced absorption of: (a) 0.5% Yb-doped LiLuF_4 and (b) 5% Yb-doped LiLuF_4 .
